

Internal Pre Monitoring Checklist

For

<p>GoogleEarth assessment</p>		<p>Determine monitoring route Identify possible areas disturbance/concern to monitor</p>
<p>Follow-up: Record encroachment/violations</p>		<p>List areas of concern documented in preceding monitoring report. Or active violations/remedies</p>
<p>Land management</p>		<p>Note Management activities scheduled either as part of noticed activities, permitted uses or identified in property management plan, action plan</p>
<p>Trails (refer to UOL Trail proposal, Sustainable trail guidelines for full summary)</p>		<p>Current trail assessment</p> <ul style="list-style-type: none"> ○ Erosion ○ Social trails ○ Trail widening ○ Educational signage ○ Reroute/Maintenance <p>Proposed trails:</p> <ul style="list-style-type: none"> ○ Flagged alignment ○ Invasive species documented ○ Vegetation disruption ○ Trail construction sustainability
<p>Potential Encroachment Considerations</p>		<p>Identify areas where potential encroachment might occur (i.e. along property boundaries, trails, areas of disturbance visible from Google earth</p>
<p>Invasive species documentation</p>		<p>Gather area surveys of invasives, familiarize with persistent invasives for the area (i.e garlic mustard, engraver beetle, toadflax). Determine current weed control regimes</p>

Understand ALL conservation values		Understand specific conservation values (per summary) read previous trajectory report
Landowner Preparation: Names, Relationship		Provide official response to landowner regarding any requests if not already provided, identify recommendations previously noted for follow up understand noted landowner goals if any
